

The perfect egg!

Naturally enough, most of the egg packaging designed by Hartmann is for eggs in weight classes S, M and L.

As you also sell XL eggs, we have developed special packaging for these eggs too.

Furthermore, when designing our packaging to keep your eggs as safe as possible, we ensure the egg-cell protects those eggs that come close in size to standard dimensions.

The following illustration provides an overview of the standard dimensions on which we base our designs.
